12 June 1973

MEMORANDUM FOR:

SUBJECT : Issues Identification

1. In the course of apportionment reviews, functional reviews, program reviews and your discussions with program manager staffs, please seek an identification of all subjects which are likely to be issues in the FY 75 program review. For this purpose we are setting no threshhold as to the magnitude of the issue, and the master list should include all kinds.

2. By the end of the week (15 June) I would like a list of all such issues which can be identified, and further request that each list be amended and updated by 22 June and 29 June. These lists will be used only within IC/CCG until a determination is made as to which issues we select for further attention in coordination with Program Managers, ASD(I), etc.

3. Issues to be identified from apportionment review should be those FY 74 actions which will or may impact as changes in FY 75 or beyond.
